# Efficiency Unleashed: A Guide to Automating WooCommerce through CLI

Jesús Amieiro Becerra

# Jesús Amieiro

Telecommunication engineer,  
focused on WordPress  
internationalization and  
translation, sponsored by  
Automattic in the “Five for the  
Future” open source initiative

[www.jesusamieiro.com](http://www.jesusamieiro.com)

We are going to learn about **WP-CLI**,  
setup **WC-CLI**, then try out some **scripts**  
that **load and export data** from  
**WooCommerce**.

By the end of this workshop, you'll feel  
comfortable **automating** your daily work  
with the **WP-CLI/WC-CLI** and with **scripts**.

**Why?**

# WP-CLI advantages

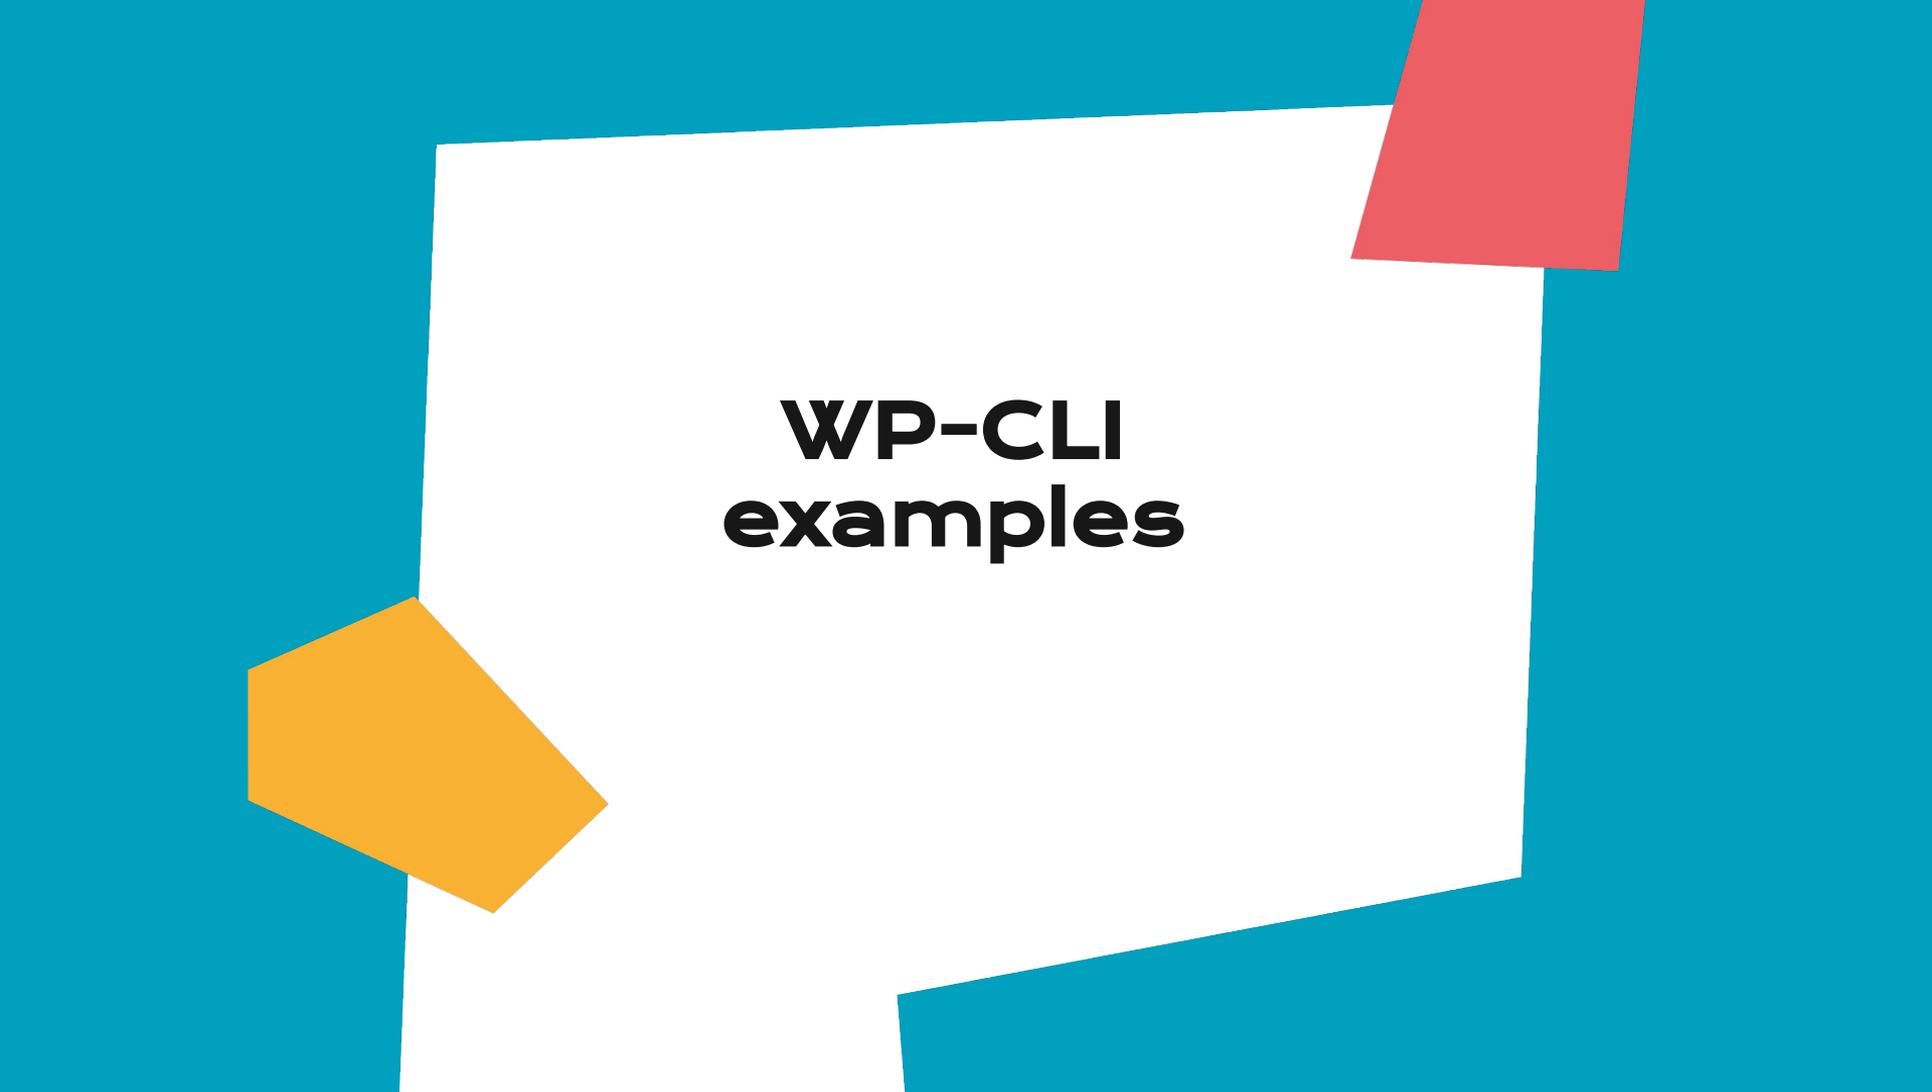

1. Speed and Efficiency
2. Automation with scripts
3. Remote Management using SSH
4. Bulk Actions
5. Reduced Resource Usage
6. Enhanced Capabilities
7. Error Handling and Debugging

The background is a solid teal color. A white rectangular shape is centered, with a red trapezoidal shape overlapping its top-right corner and an orange trapezoidal shape overlapping its bottom-left corner. The text 'WP-CLI installation' is centered within the white area.

# **WP-CLI installation**

# **WordPress installation**

The background is a solid teal color. A large white rectangle is centered on the page, tilted slightly. In the top right corner of the white rectangle, there is a red trapezoidal shape. In the bottom left corner of the white rectangle, there is an orange trapezoidal shape.

# **WP-CLI examples**

# WP-CLI examples

1. Flush cache
2. Delete spam comments
3. Create automated backups
4. Create the .pot files for i18n
5. Deactivate plugins, to detect problematic plugins
6. Update the URL when you make migrations
7. Set the site in maintenance mode
8. Update core, plugins, themes and translations automatically

# WooCommerce CLI

WP-CLI vs. WC-CLI

# Functionalities

1. General Settings
2. Taxes
3. Shipping methods
4. Payment methods
5. Accounts & Privacy
6. Products

# Scripts

Dev & production

# Scripts

## Creating data

1. Import products from a CSV file
2. Create fake customers and orders

# Scripts

## Exporting data

1. Export pending orders
2. Customer list (for mailing purposes)

**Thank you!**
